Mr. E. J. Osler, President
Permalux Company
500 Rathbone Avenue
Aurora, Illinois

Dear Mr. Osler:

Thank you for the fine service of your company in expediting delivery of our recent order of trade mark decalcomanias.

The efforts of your entire staff in the production and shipping of the material indicates a willingness to help a customer even beyond a normal line of duty. It makes us feel that we are friends rather than just customers after these many years.

I know that you will be interested to hear that in talking with Ralph Kreyling, our Paint Shop foreman, today, he boasted your decals by a simple statement - "The new decals are as good as ever, and maybe a little bit better. They seem to have more glow and sharpness in the colors and letters." From Ralph, that is a testimonial!

When a product can consistently satisfy the men who work with them, it stands the test.

Please accept my best wishes for a Happy and Prosperous 1951, and extend the greeting, if you will, to your entire staff.

Yours very truly,

UNITED VAN LINES, INC.

UNITED
AIR LINES

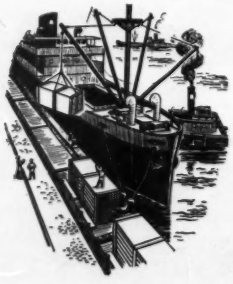

For more than a third of U.S. exporters it's nearly 100 MILES CHEAPER!

That's a fact! Philadelphia is closer to more North American manufacturers than any other eastern port. Check differences in road or rail mileage. The absence of lighterage or transfer charges, hazards, and delays, and the ease and dispatch with which goods are delivered directly to the ship's berth, all favor Philadelphia as your point of export.

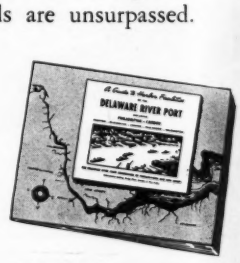

With those advantages you can either pocket the savings or submit a more favorable price to overseas customers. Remember, too, The Delaware Port is served by three major railroads, scores of motor carriers and 68 steamship lines on regular schedules to foreign and domestic ports. Its facilities for handling and storage of any kind or quantity of goods are unsurpassed.

Fifty Years of Progress

About a year ago, there was some argument about when the new half-century began. Some said it started on January 1, 1950; others maintained it did not begin until January 1, 1951. But there is no argument as to our own half-century mark. This issue, as you see, bears the venerable inscription of "Vol. 50."

Fifty years covers not an era, but a succession of eras. Since 1901, this country and the world has been through some unbelievable experiences—and will go through more.

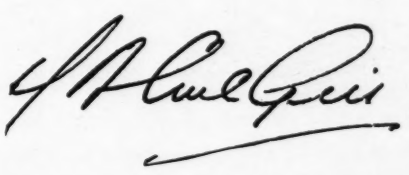

Speaking strictly for ourselves, we have passed through five distinct eras, or stages of development. Originally we were *The Team Owners Review*, and trotting along smartly. In 1915, a few months after a famous archduke was done in, we became *Transfer & Storage*. But the world was changing, and we knew a broader editorial outlook was needed. Accordingly, in 1919, we became *Distribution & Warehousing*, by which name you knew us for the next 26 years.

During that quarter of a century we kept our eyes on the future, and saw that word "distribution" assuming more and more significance. Throughout the burgeoning 'twenties and formative 'thirties, we watched distribution's meaning expand. Where our editorial coverage had once been confined largely to local distribution, it now began to embrace various phases of the huge, ramified task of moving raw materials to the plant and finished products from the plant to the point of sale or warehousing. We had many things to say about materials handling, shipping, and traffic management, as well as warehousing.

During World War II, *DandW* took another evolutionary step. It saw a postwar world in which competition coupled with war-inflated costs must surely force management to think about distribution—one of the last frontiers where industry could achieve efficiency.

The day after V-J Day, then, the first issue of *Distribution Age* appeared, heralding a fresh concept of distribution. It became the first magazine to discuss distribution as an integrated function, and as essential as production itself. With the world again approaching the shadows of war, distribution will surely grow in significance.

All through our first 50 years, we have had generous assistance from the distributive industries we have served. Our relationship with you has been a happy one, and we trust that the reciprocity which has benefitted us both will continue beyond another half-century.

Low-Cost Building Material

American Bildrok Co., a recently organized enterprise, is producing new type of building material—a lightweight aggregate of minerals using Portland cement as binder. It is manufactured in variety of insulating, acoustical, and structural building panels, and, according to manufacturer, panels incorporate structural and insulating requirements for a wall in 1 material where ordinarily up to 6 separate materials are used. Consequently, it is said, considerable saving in material costs and construction time have resulted. Bildrok is fireproof, rot-proof, and termite-proof, and can be sawed, nailed, or drilled with standard woodworking tools.

We believe this directory to be the only classified list of all types of equipment, supplies and special services purchased nationally by shippers, freight carriers and warehousemen. We have attempted to standardize the nomenclature instead of using multiple classifications for a given piece of equipment, illustrating certain types for clarification.

Drivers Prefer Trucks with

EATON

2-Speed Truck

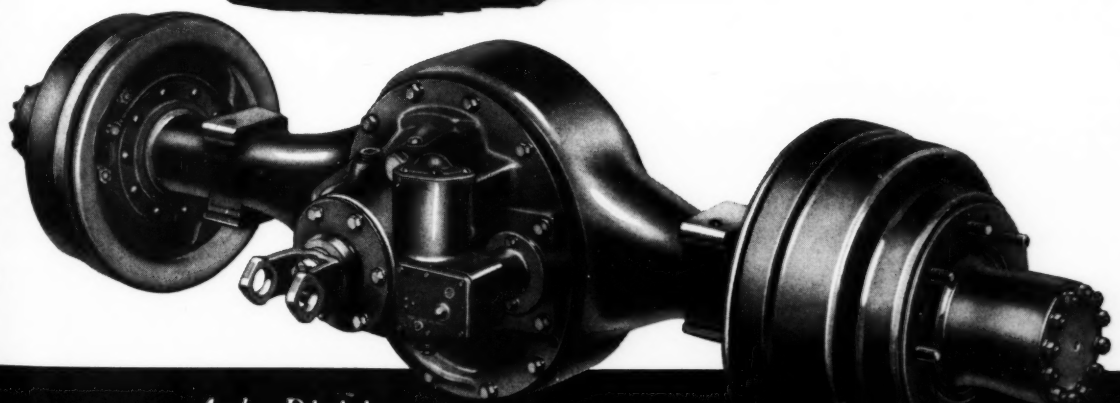

AXLES

Drivers report they are less fatigued after long trips on trucks with Eaton 2-Speed Axles. Eaton equipped trucks are easier to maneuver; quicker on the get-away in traffic; climb hills more smoothly; highball on the open road yet have plenty of power to pull out of tough spots.

These advantages are possible because Eaton 2-Speed Axles give drivers twice the conventional number of gear ratios from which to choose the one best suited for road and load conditions.

Truck owners also are pleased with Eaton 2-Speeds by the saving in maintenance costs, faster schedules, lower cost per mile. Your dealer will be glad to explain how Eaton's planetary gearing, positive lubrication and other exclusive features make Eaton axles last longer.

KINNEAR STEEL ROLLING DOORS

GREATER EFFICIENCY FOR EVERY TYPE OF DOOR NEED

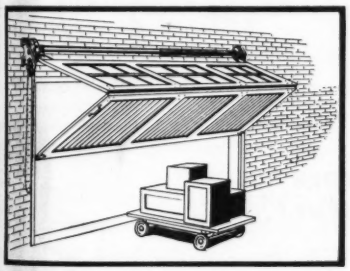

KINNEAR ROLLING DOORS — The interlocking steel slat door was *originated* by Kinnear. With smooth, easy, coiling upward action, this famous door glides out of the way overhead, safe from damage. Doorways remain clear *from jamb to jamb and floor to lintel* — until the doors are closed. Wall and floor areas around the opening are always fully usable.

The tough, flexible, all-steel Kinnear curtain assures longer service life, lower maintenance costs, higher resistance to weather, wear, fire and intrusion.

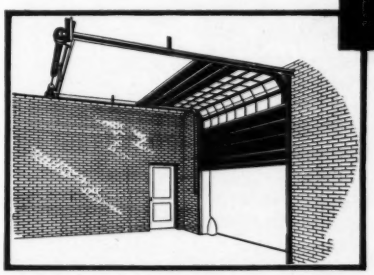

For maximum ease, speed and convenience, Kinnear Rolling Doors can be equipped with Kinnear Motor Operators, with controls at any number of remote points. Hand-lift, chain or crank operation also available.

Kinnear Doors are built any size for old or new buildings.

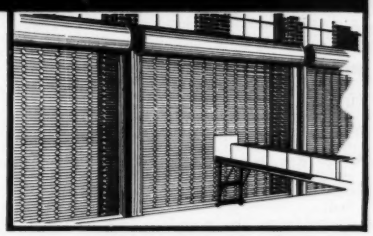

KINNEAR ROLLING FIRE DOORS AND SHUTTERS (Labeled by Underwriters' Laboratories, Inc.) Equipped for positive, automatic closure in case of fire.

KINNEAR BIFOLDING DOORS — Sturdy two-section doors that "jackknife" to a horizontal, overhead position. Sizes for any opening, with panels for glass to meet any requirement. Also heavy-duty Bifolding Doors with lower section that "telescopes" with top section, both sections then rising overhead.

KINNEAR RoL-TOP DOORS — Sectional-type upward-acting doors roll smoothly and easily to a horizontal position overhead. Any number of sections can be paneled for glass. Motor or manual operation. Built in a full range of sizes for industrial, commercial, and residential needs.

fast, easy handling of materials helps make production miracles possible

ELECTROLIFTS

cut time and distance between plant operations to a minimum

For serving a lathe, the operator handles a Monorail ElectroLift with Push Button Control.

Picture an express highway speeding traffic over congested areas and you have the idea of how ElectroLifts streamline plant production.

Built to operate with unusually close headroom, ElectroLifts take up no valuable space themselves, provide all of these advantages:

SAVE TIME

Up to six tons of materials can be moved at once, over the most direct path to the point where needed, without waiting for, or delaying any other operation.

SAVE SPACE

No floor space need be kept open for the flow of materials, equipment can be packed in closer, no depots at machines must be maintained.

RELEASE MAN-POWER

One unskilled man can operate an ElectroLift and move tons of materials quickly, safely and easily. Skilled man-power is thus kept busy on actual production.

Engineering Service — Because of the variety of speeds, capacities and hoists available to meet the most specialized industrial handling requirements, it will pay you to consult ElectroLift Engineers for the type of ElectroLift best suited to your particular needs. Call on this service any time.

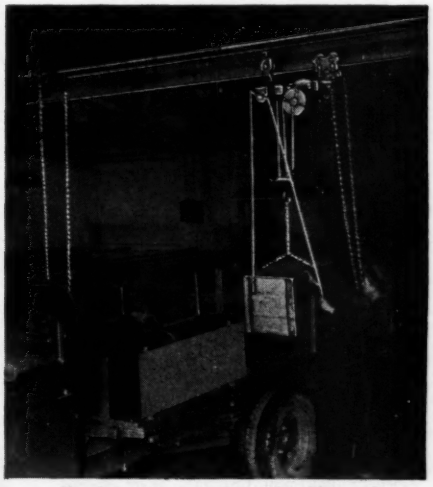

Features of ElectroLifts that make them Outstanding in Production Work

Exclusive Worm Drive Mechanism . . . makes ElectroLifts quieter in operation, longer lasting, more compact and efficient.

Totally Enclosed Motor. . designed especially for hoisting service.

Large Diameter Drum . . . grooved to prevent cable overlapping.

Choice of Controls . . . cord or push button control, remote control or completely automatic control may be had as desired.

Truck loading is easier with a Monorail Rope Control ElectroLift.

IT'S NEW—

a low cost Collapsible Pallet Box

Here's a brand new money saver for in-plant storage and handling of materials, loose, bulk or packaged, and for outside shipments, too. Its low initial cost will save thousands of dollars for plants using pallets in quantity.

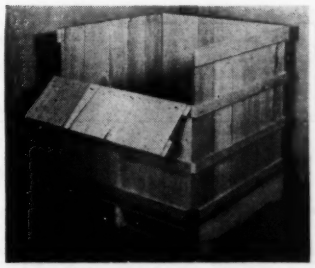

Above: Photo shows how pallet box is easily attached to any standard pallet by means of 4 flanged corner irons (furnished by us) and a single steel strap, either flat or round.

Above: Photo shows hinged box collapsed for storage or return shipment. Tops can be furnished if desired.

The new B-G Wooden Collapsible Pallet Box is light in weight but built strongly enough to handle weights up to 3000 lbs. and more and is sturdy enough to stand up under many repeated shipments.

The collapsible feature is made possible by the exclusive Bigelow-Garvey TIGHT CORNER hinge design used on all of our collapsible wood shipping crates.

Above: Photo shows drop leaf to permit removal of materials without removing upper tiers of pallet boxes.

Used as a storage box, a tote box or as a shipping container, you will like this sturdy but inexpensive addition to effective materials handling.

Pallet Boxes shipped in carload quantities only — can supply any size you desire, with or without pallets and top covers.

WHAT- *no wires?*

That's it, when you install the modern enclosed FEEDRAIL trolley busway electrical distribution system. Current carrying bus bars are enclosed in a protective track housing. Mobile current collecting trolleys operate within the track. Only two basic units — track and trolley.

To operate a crane or hoist the trolley is directly attached with a strong pantograph linkage and the two move together. The trolley supplying the power travels in the track that parallels the crane or hoist run. This eliminates long trailing cables or exposed wires and the hazards and annoyances that they represent.

When ELECTRIC FEEDRAIL is used over production assembly lines, the portable tools can be kept within convenient reach by hangers on the trolleys and the tools can readily follow the work being processed.

Track is furnished in any length or contour. Trolleys and Ever-lok connectors are available fused and unfused. The whole FEEDRAIL system can be modified, extended, disassembled or reassembled in a new location using the same standardized units.

Learn how you can increase your material handling saving by installing an ELECTRIC FEEDRAIL trolley busway system.

News worth repeating

NOW there's a great new series of Internationals, specialized for maximum efficiency in diesel truck operations.

These trucks are the "toughest of the tough" heavy-duty engineered Internationals, with traditional stamina that has kept Internationals first in heavy-duty truck sales for 18 straight years. In addition, new LD-300 (4 wheel) and LFD-300 (6 wheel) Series Internationals deliver power and fuel economy you'd expect of advanced diesel truck engineering.

Comfort? Ahh—you get the Comfo-Vision Cab, with greater roominess, full front visibility through the one-piece Sweepsight windshield, and more positive steering control and maneuverability from a more comfortable driving position.

Advanced engineering features range from a radiator, designed for foolproof temperature regulation, to "perfect parallel" alignment of engine, transmission, propeller shaft and rear axle, for smoother performance, longer life.

Available in specialized Roadliner or Loadstar models for highway or combination highway-off-highway operation . . . choice of seven different diesel power plants . . . GVW's from 30,000 to 45,000 pounds, GCW's from 68,000 to 76,000 pounds.

"our new WHITE 3000 earns EXTRA REVENUE"

. . . Reports Rene Poutot, President, MANUFACTURERS EXPRESS, INC., New Haven, Conn.

IT'S THE PERFECT ANSWER to today's operating problems! That's the report from Rene Poutot, president, Manufacturers Express, Inc., of New Haven, Conn., who knows from on-the-job performance that the new White 3000 is engineered for extra revenue.

"Our units travel the New England area, through heavily congested truck routes," Mr. Poutot reports.

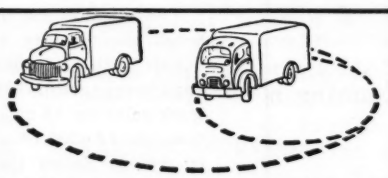

"We know from long experience that White Trucks are outstanding from a fuel and maintenance economy point of view. Now we have something more with the new White 3000 —extra revenue and greater reliability under our operating conditions.

"Our drivers like the handling, the ride and the visibility," he says. "We like its modern appearance, the savings in depreciation because it is built to last, and of course, the 20% savings in maintenance because of the power-lift cab.

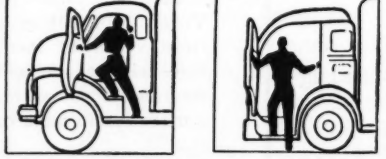

"Our weight worries are over, too," Mr. Poutot says. "The 3000 design permits more payload under strict highway limits, and that means more revenue."

Here's another report of extra earning power made possible because this entirely new kind of truck is functionally designed for greater usefulness.

Ask your White Representative for facts about the exclusive advantages of this new White 3000 for your business.

ONE LARGE WAREHOUSE ACTUALLY HALVED ITS AISLE SPACE WITH A LYON-RAYMOND SPACEMAKER! AISLES 12-FT. WIDE WERE REDUCED TO 6-FT. WITH MORE USABLE STORAGE SPACE RESULTING.

Now — right in your own plant or warehouse — you can make comparable savings in costly floor space with a LYON-Raymond SpaceMaker. This new tiering truck is so compact, it actually right-angle tiers 4-ft. pallet or skid loads 130-inches high from aisles only 6-ft. wide. Think how it could increase your storage capacity within your present facilities!

How the SPACEmaker does it . . .

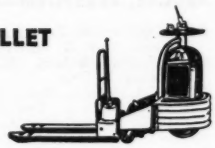

SHORTER LENGTH SpaceMaker design eliminates counterweight—shortens overall length.
MAGIC MANEUVERABILITY Offset drive wheel produces 200° turning arc — enables it to maneuver like magic!
LIGHTER WEIGHT Compact size enables it to be used in low-capacity elevators and on lighter capacity floors.

GET THE FULL FACTS on the LYON-Raymond SpaceMaker — write for Bulletin 701 today and ask where you may see a demonstration. SpaceMaker Model E2ST. Straddle Type, Telescopic Tiering Truck, 2000-lb. capacity for two-face pallets. Also non-telescopic and skid platform types.

SHORTEST OVERALL LENGTH due to most compact power unit. Turns in smaller radius, leaves more room for storage.

EASIEST TO OPERATE. The only Walkie Type Truck with the easy grip roller type handle, giving two speeds forward and two speeds reverse by a turn of the wrist. Push buttons in the ends of handle control hydraulic lift.

GREATER POWER. 12-volt motors for level operation, 18-volt for ramps. Costs but a few pennies for 8-hour day.

SAFER. Dead man controls and exclusive braking system ensure real protection for both operator and load.

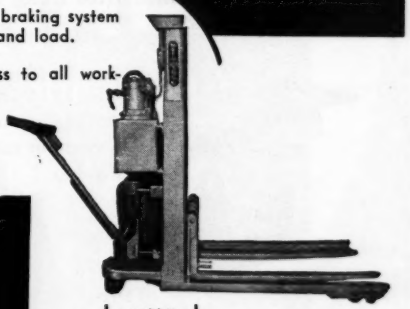

EASIEST ACCESSIBILITY. Quick access to all working parts—a time saver in inspecting and servicing.

KEYS AND SYMBOLS

THE following pages contain many abbreviations, symbols that stand for something specific and tangible. They convey information of practical value to buyers of transportation, handling, warehousing and other distribution services.

On these pages you will find the keys to the abbreviations used in this directory. The abbreviations have been simplified and standardized as far as consistent with variable usage and customary practice. These keys and symbols are tools meant to be used.

Complete listings identify public warehouse advertisers; nearly 1,200 of them. Non-advertisers are listed in single lines of lightface type.

When you ship by rail, the complete listings show you the road and station both for carload and l. c. l. shipments, and whether a siding is available.

When you ship by water, they show the body of water, length of dock and water depth.

When you ship by truck, the listings show the motor carrier facilities operated by warehousemen in your own locality, and the motorized equipment available at all points where you may spot your stocks or distribute pool cars.

Your handling problems will be minimized by referring to the complete listings for available materials handling and rigging equipment.

Although every precaution has been exercised in the compilation of this directory, the publishers cannot assume responsibility for errors.

. . . for Streamlined Service

AT NEW HAVEN SMEDLEY HITS THE SPOT

SMEDLEY CO. has become the synonym for "Streamlined Service." For the past 90 years we have based all our operations on the knowledge that our customers demand and expect their distribution and storage problems to be solved with economy, speed and security. This far-sighted operation has made The Smedley Company one of the East's outstanding merchandise storage and distribution organizations.

To our fireproof and semi-fireproof buildings for the storage of merchandise and household goods we have added (sketched above) the most modern type of one-story streamlined merchandise warehouse designed on the recommendations of the Department of Foreign and Domestic Commerce.

New Haven is the ideal location if you want to reach the concentrated Southern New England market . . . The Smedley Company is the logical choice for storage or distribution with economy and security.

CONTROLLED DISTRIBUTION

To secure your share of trade in any important market it is essential that you maintain a spot stock of your products at that point. Buyers are not willing to wait for shipments from distant points, neither are they willing to carry large stocks nor to buy in quantity. Your ability to sell your products therefore depends largely on having stock from which immediate deliveries can be made; and an organization back of the goods which will insure prompt service.

Cars consigned to yourselves in care of any warehouse company affiliated with Allied Distribution Inc., are delivered direct to the warehouse on private railroad siding without additional switching charges. On arrival these cars are handled immediately and in accordance with any instructions given. Warehouse receipts are issued and proper steps taken to protect you in case of any loss or damage enroute.

The warehouse companies listed here have adequate facilities in the country's foremost distributive centers. They are eager to cooperate with you collectively thru Allied Distribution Inc., or individually as best meets your needs.

We look forward to many opportunities to serve you. Information concerning storage and distribution facilities, services and charges will be furnished on request and without obligation.

For authentic information about all warehouses affiliated with Allied Distribution Inc., refer to the current issue of Distributors' News. If you are not on this monthly mailing list, send for free copy.

GOOD BALANCE

. . . is a mighty important factor in many fields of endeavor—whether applied to a circus performance, aeronautics, navigation or an every-day business operation.

In the latter application, many Traffic and Sales executives have come to recognize our facilities and service in Chicago, Kansas City and Los Angeles as the balance wheel between production and distribution.

Modern warehouses—the right kind of storage space to temporarily house and care for your products, streamlined handling equipment to expedite in-and-out movement, plus a comprehensive branch house service in these great American markets, are features that we believe will help keep operations on an even keel.

Our New York, Chicago, Kansas City or Los Angeles office will welcome an opportunity to talk over your warehousing and distribution problems.

Low-Cost Warehousing for the Carload Shipper Serving the Mid-West, South-West and ST. LOUIS

Strategically located right across the river from St. Louis in East St. Louis, Illinois, is the Mississippi Avenue Warehouse—9 acres of insulated storage space on one floor!

These unusually convenient and economical facilities with their custom bonded space, humidity control and complete handling equipment are being used by some of America's largest corporations.

Self-Contained Individual Units

The entire 360,000 square feet of storage space (with 50,000 additional square feet of loading dock) is separated by 18-inch walls into eighteen self-contained individual units of 20,000 square feet. Each unit has its own entrance, heating plant, railroad track space, and 110 feet of its own loading platform for trucks.

Brick and concrete walls, heavy-duty concrete floors and a roof insulated 100% with rock wool indicate the solidity of the structure and the almost unlimited floor load which it is capable of handling.

Railroad and Barge Switching

The property is located on the tracks of the St. Louis Terminal Railroad Association which provides switching service on carloads from all railroads and all barge lines. One-half mile of private track (providing space for more than fifty cars at one setting) serves the full length of the building. Access for trucks is conveniently available over Illinois Highway No. 3.

Iberville Warehouses Corporation

324 North Peters Street
NEW ORLEANS 16, LOUISIANA

The only privately owned and operated public warehouse at shipside in *New Orleans*

SUCCESSOR IN NAME BUT UNDER THE SAME MANAGEMENT AS DOUGLAS SHIPSIDE STORAGE CORPORATION ESTABLISHED 1930 TO SERVE THE PORT OF NEW ORLEANS

At the gateway of the midcontinent, with easy access by steamship, barge, rail and truck, stand 10 modern Gulf Shipside warehouses . . . more than 200,000 square feet of covered and 300,000 square feet of open yard storage . . . public, state and U. S. customs bonded . . . served by a new 500 foot wharf, shipside tracks, a cotton compress, and the latest in pallets and handling equipment.

Gulf's experience, know-how and historic integrity are behind this steadily growing business, founded on the satisfaction of clients today and over a period of 20 years.

These advantages, combined with important savings in handling costs, shipside freight rates and absorptions have made storers feel that in New Orleans, the best is Gulf Shipside.

FROM NEW ENGLAND'S LOGICAL

Distribution Center

WORCESTER is central New England's logical distributing center. CONTROLLED DISTRIBUTION

To secure your share of trade in any important market it is essential that you maintain a spot stock of your products at that point. Buyers are not willing to wait for shipments from distant points, neither are they willing to carry large stocks nor to buy in quantity. Your ability to sell your products therefore depends largely on having stock from which immediate deliveries can be made; and an organization back of the goods which will insure prompt service.

Cars consigned to yourselves in care of any warehouse company affiliated with Allied Distribution Inc., are delivered direct to the warehouse on private railroad siding without additional switching charges. On arrival these cars are handled immediately and in accordance with any instructions given. Warehouse receipts are issued and proper steps taken to protect you in case of any loss or damage enroute.

The warehouse companies listed here have adequate facilities in the country's foremost distributive centers. They are eager to cooperate with you collectively thru Allied Distribution Inc., or individually as best meets your needs.

We look forward to many opportunities to serve you. Information concerning storage and distribution facilities, services and charges will be furnished on request and without obligation.

For authentic information about all warehouses affiliated with Allied Distribution Inc., refer to the current issue of Distributors' News. If you are not on this monthly mailing list, send for free copy.

AN ASSOCIATED WAREHOUSE

Saving Money for Storers in New York

Distribution and Warehousing New York State A.B.C. Board Warehouse Permit
Lehigh Valley Railroad Siding

WAREHOUSE AND LOCATION

The Midtown Warehouse, Inc., is in the Starrett Lehigh Building. Considered the most modern industrial building in New York City.

Situated on the sixth and other floors. Capacity more than 250,000 square feet. 85,000 square feet U. S. Bonded Warehouse.

VENTILATING, HEATING, ETC.

Warehouse is light, airy and well ventilated. Heated in the winter by modern thermoleer units which are thermostatically controlled, allowing us to maintain any desired temperature with these instruments.

WAREHOUSE ACCESSIBLE

By freight or truck elevators. Elevator capacity more than 30,000 lbs. Merchandise can be loaded or unloaded on street platforms or in truck pits right outside of our warehouse doors inside the building. This eliminates the hazards of street loading.

LOW INSURANCE

Compare with others. We are absolutely fireproof.

RAILROAD SIDINGS

Building is known as less carload station on Lehigh Valley tracks. This permits us to handle either carload or less carload freight without cost to the storer.

FREE CALL AND DELIVERY SERVICE

By all R. R., coastwise S. S. carloading Co.'s and long distance Truck Operators.

DEEP SEA AND COASTWISE PIERS

We believe we are ideally located for both. This should result in a low cost of cartage to or from this particular point.

INSPECTION INVITED

We respectfully invite you to inspect the premises at any time, at your convenience so that you may see for yourself the modern warehouse we are operating.

We call attention to our affiliate ultra-modern warehouse at 29-39 Pavonia Ave., Jersey City, N. J. Situated on the Erie R.R. and Hudson River. Send for further details of this warehouse—The Mid-Hudson.

CINCINNATI...

THE IDEAL DISTRIBUTION POINT
TRADITIONAL GATEWAY TO THE NORTH AND SOUTH

Major Air Lines reach every important center east of the Mississippi within a matter of hours.

130 Interstate Truck Lines reach 25 million people overnight.

River Steamers and Barge Lines make Cincinnati a key terminal for low cost transportation rates.

Eight Major Railroad Trunk Lines enter Cincinnati.

40% of the U. S. population lives within a radius of 400 miles of Cincinnati.

Cincinnati is located within easy reach of points North, East, South and West.

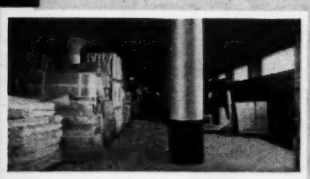

Cincinnati has the lowest average freight rate to the entire U.S. as compared to any other large distribution center. Besides extensive rail, river, truck and air line transportation there is plenty of labor both skilled and unskilled in addition to all the accommodations of a great, progressive city.

Excellent facilities and strategic location—close to millions of buyers in one of the country's richest industrial areas—make Cincinnati the headquarters for leading national manufacturers and distributors.

For sound economy, for faster deliveries, for closer contact with a vitally important market, join these leaders by establishing a branch in this key distribution center in the city closest to America.

The services and facilities of Cincinnati Terminal Warehouses, Inc., completely meet every need, allow the full realization of Cincinnati's advantages.

STORAGE INTRANSIT

The savings effected by Overmyer's *Storage Intransit* facilities are quite amazing! Today, when distribution costs are climbing steadily, Overmyer offers a service to manufacturers which can cut these costs *right down to the bone.*

***Storage Intransit* makes it possible for a manufacturer to plan around seasonal surplus production . . . regularize his distribution, and store his merchandise *off his own premises* to better utilize dead storage space for year-around, levelized production. Moreover, consumer goods which demand fast handling to all points are right at home in Overmyer's strategically located Warehouse . . . are "johnny-on-the-spot" when needed.**

Overmyer's *Storage Intransit* guarantees your merchandise proper protection . . . assures ultimate shipment to the correct destination by the most economical carrier *with time-table precision.*

Find out for yourself that Overmyer has the right angle in terms of your own distribution requirements.

When efficiency's wanted
At costs no higher,
Smart businessmen call on
Overmyer.

WAREHOUSE DISTRIBUTION

Distribution costs come way down when planned around Overmyer's *Warehouse Distribution* system.

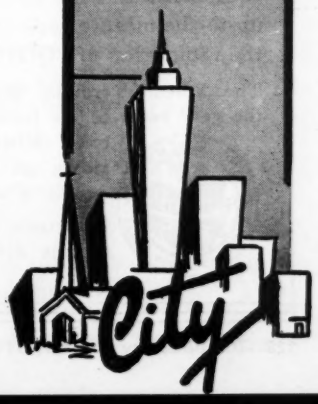

All a shipper has to do is send his output to Overmyer's big, centrally located Warehouse . . . then Overmyer's trained staff takes over the usual costly details of distribution, *with money-saving efficiency.*

Overmyer checks the shipments for condition and quantity. Receipts are issued to the shipper . . . goods are stored efficiently so that orders can be filled from stock quickly and at lowest cost.

Actually, Overmyer does the work of a factory branch at a fraction of the cost. Trucking, handling, sorting, routing, reshipping, etc., are handled by Overmyer saving the manufacturer money otherwise spent on rent, leases, service, cartage, insurance and the like.

There's no doubt that Overmyer has the right angle in saving money through *Warehouse Distribution!*

LOWER DISTRIBUTION COSTS...

IN PORTLAND and the Pacific Northwest Market

PORTLAND... the most advantageous distributing point in the Pacific Northwest

Distribution in the white area of this map costs less from Portland than from any other Pacific Coast city. In the red area, rates from Portland are equal to those from other major distribution centers.

The white and red areas have a combined population of 3,200,000 (1949 est.). This is a rich and growing region. Oregon, Washington and Idaho have a spendable annual income of $1,337 per capita; national average is $1,289 per capita.

Oregon Transfer Co. equipped for fast, efficient distribution

With a fleet of more than 100 trucks, Oregon Transfer Co. can handle orders as soon as they are received. Deliveries are made promptly throughout the Pacific Northwest. We know local and regional shipping conditions thoroughly and are in a position to recommend the services best suited to a shipper's needs.

One man's bedroom set looks pretty much like another's, a fact which most people have learned to live with, but which household goods movers spend sleepless nights over. The latter, we are happy to report, can now lie down with minds at rest, thanks to the ingenuity of a manufacturer of warehouse supplies who has marketed an item designed expressly to *separate* one man's bedroom set from another's. He calls it a load separator and so do we. Look for it—and whatever else you need in the way of warehouse supplies—in the WHERE-TO-BUY Section.

GSA Helps You Sell to Government

THE government of the United States is the largest buyer of commodities in the world. The total of its annual purchases is mounting enormously because of the demands of the defense program. The General Services Administration who are charged with the buying function for many government agencies realize that it must have what the manufacturers of the nation have to sell. Likewise, it knows the suppliers need these government orders.

With that in mind GSA has been working to enable suppliers to steer clear of delays and involvement which in the past may have slowed up the buying-selling process.

Looking towards that objective, and at the same time broadening the Government's sources of supply, GSA has:

• Established regional offices in 10 important and widely separated cities: Boston, New York, Washington, Atlanta, Chicago, Kansas City, Dallas, Denver, San Francisco and Seattle.

• Made arrangements to set up in each region an information office where suppliers may get necessary data, specifications and blank forms, and may be directed to the appropriate purchasing agent to sell their commodities.

• As a red-tape cutting move, has developed in cooperation with other Government agencies a short-form purchase-order voucher-invoice which a government agent, authorized to make purchases in the open market, can use. Normally this new form is limited to purchases of $500 or less, except when used by the GSA and the Department of Defense. Those two agencies may use it on purchases up to $1,000. Processing orders for small amounts has long been an expensive procedure. The use of this new form will speed up the transaction by shortening it, so that the supplier gets his money more quickly.

• Because of geographical considerations, has transferred the purchase of certain general classes of federal supplies from Washington to its New York and Chicago regional offices. As an illustration, the New York regional office will purchase gaskets, leather, brooms, chemicals, flags, cable, drygoods, toilet articles, stationery, office supplies and equipment, and fire-fighting apparatus (except fire trucks and engines which are bought in Washington).

The Chicago regional office will buy bathroom fixtures, toilet articles, hand tools and general hardware. Region No. 3 Office in Washington will buy furniture.

There is another operating change. On additional items of stationery supplies and toilet articles, purchasing will be zoned. That is, regional offices will buy for their respective contiguous areas: New York for the eastern areas, Chicago for the midwest, and Seattle for the far west.

Each region will make its own schedule contracts and services in the purchase of eight specific items, as existing national contracts for these goods and services begin to expire next March 1. These eight items are: fuel oil and kerosene; service station deliveries of gasoline and oil; recapping and repairing tires; lubricating and other oils and greases; automotive storage batteries; wooden boxes, packing material, etc.; solvents; repair and maintenance of typewriters.

• Arranged with the Department of Commerce to publish daily a synopsis of the current needs of the Department of Defense, the Commerce Department, the General Services Administration, and the Veterans Administration. It is also preparing to list the daily needs of other government agencies. These

Huntington, the largest city in the state is the gateway to the billion dollar coal fields and the Tri-State territory. Are you taking advantage of the opportunity this territory offers for your product? These people are really spending money. A good salesman, sufficient stock to care for the business and quick shipment thru the warehouse is a combination that will get and hold the business.

3 important ways HANSEN improves your distribution to a 3½ BILLION dollar* market

1. OUTSTANDING FACILITIES . . . shown here, the Hansen downtown warehouse. Located in the heart of metropolitan Milwaukee, and immediately accessible by rail, truck, ship or plane. With 6,000,000 cu. ft. of storage space.

2. MODERN METHODS . . . Hansen carries your overhead. By using only the latest machines and methods Hansen helps reduce your sales costs, also eliminates reams of red tape, yet keeps you constantly up to date on your inventory.

3. PUBLIC WAREHOUSING AT ITS BEST . . . Shown here is the new Hansen warehouse and outdoor storage plant. Located on the northwest outskirts of Milwaukee in the midst of a booming industrial and manufacturing development, the new warehouse has 1,000,000 cu. ft. of indoor storage space; 5 acres of industrially fenced outdoor storage area.

Even in a period of dwindling inventories it is expedient to serve your sales outposts to the best of your ability. Prompt delivery of what goods there are, with a minimum of red tape, and a constant record of undamaged or unspoiled merchandise will keep your retailers and distributors on your side, assure you of their allegiance during the sellers' market, and an all out effort during a buyers' market.

For complete information, write to the Hansen Storage Co. . . . Let Hansen's experts show you how to lop off a healthy portion of your distribution costs for goods coming into Wisconsin . . .* a market estimated in the 1950 Management Survey at $3,500,000,000.00.

GSA HELPS YOU SELL TO GOVERNMENT

(*Continued from page* 383)

synopses may be had at regional GSA offices, as well as at thousands of chambers of commerce and cooperating business houses in various localities.

These are all moves in the direction of making it easier to do business with the government. GSA is also studying existing laws and regulations, and plans to recommend other changes where they can be made without weakening existing safeguards.

GSA's intention is that there shall be no more red tape and paperwork connected with selling to Uncle Sam than in doing business with any other big corporation. True, there are certain safeguards and regulations that have to be observed. GSA is charged with the responsibility of setting up a framework of procurement procedures within which bidding and selling and the other necessary details must be done. These procedures may differ somewhat in minor respects from the usual private business methods; but once they are understood and followed, the rest is fairly plain selling.

How do you get your name on the mailing list to receive supply schedules and other publications of what the government needs? Simply write to your regional GSA office, using your own letterhead and explaining who and where you are, what you sell, how long you have been in business. In return you'll get a questionnaire to fill out. It is necessary that GSA makes sure you are a qualified supplier and equipped to make deliveries as agreed.

Mail the questionnaire to: Federal Supply Service Inquiry Office, c/o GSA office in your region.

The federal government follows several methods of buying. That most commonly used is through advertising for sealed bids and making public awards. In addition to the bidders' list sent out in response to requests, by mail, notices of public bidding are displayed in post offices. Full information is given concerning specifications, terms and conditions, where and when bids will be opened. Contracts, are of course awarded strictly in accordance with the law, to the lowest bidder meeting the specifications, and take into consideration any special factors (time of delivery offered by the bidder, discounts offered, and so on). Split awards are sometimes made because of geographical and delivery factors.

Sometimes the government buys through direct negotiations with suppliers. As many qualified buyers as possible are brought into the picture. Negotiation is used where small amounts of goods are called for, or in time of national emergency, or for research and development of new devices, or in certain other circumstances where advertising will not serve the purpose.

Where national security is involved purchases are naturally made through negotiations.

And there is another matter that is important from the veiwpoint of the supplier — payments. Recognizing that the government, because of the vast machinery involved, has in the past required longer to pay its bills than many private businesses would, GSA is taking steps to speed up that process with a view to discounting all bills.
